BUSINESS SIZE
Small Business

Global Economic Research Consulting (GERC) is a woman-owned research and government-contracting advisory firm in San Bernardino, California. We take small businesses, nonprofits and public agencies from unregistered to under contract, doing the hands-on work with them: completing registrations, preparing and submitting certification applications, writing the bids and grant proposals. That implementation rests on research, so clients know which opportunities are worth pursuing before they spend on one. Every engagement is led by **Dr. Shirley Ayangbah**, a PhD legal economist with 14+ years in international law and economics.

SECTORS SERVED

Construction Construction management Public works Real estate development Housing & infrastructure Logistics & transportation
Vehicle repair & franchise Food service Security services Aerospace & defense Energy & environment Nonprofits & tribal entities Public agencies

CORE COMPETENCIES

- **Grant research & writing.** Federal, state and foundation program research, narrative and budget development, submission and post-award follow-up.
- **Feasibility & economic analysis.** Investment, rate, resource and cost-benefit modeling supporting capital decisions.
- **Registration & certification management.** SAM.gov and UEI validation, Cal eProcure, DGS SB / SB-PW / DVBE, 8(a) and HUBZone — filed and renewed.
- **Proposal & bid development.** RFP, RFQ and RFI responses, SF 330s and statements of qualifications, written against the stated evaluation criteria.
- **Market & industry research.** Demand, competitive-landscape and market-entry analysis, including cross-border trade.
- **Procurement compliance support.** Certified payroll and prevailing wage, NIST SP 800-171 documentation, renewal calendars.

WHAT SETS GERC APART

- ▶ **We guide, advise — then do the work.** GERC assembles the evidence, completes the filing and submits on the client's behalf: registration through certification through bid. Clients are not handed a checklist.
- ▶ **Research before pursuit.** Feasibility and market analysis establish which opportunities are worth bidding before a client spends on one.
- ▶ **Sustainable solutions, built to the client's situation.** Engagements are sequenced so eligibility holds — renewal dates, compliance calendars and size thresholds set at the outset, so certifications do not lapse between awards.
- ▶ **Principal-led, with the tools handed over.** A PhD legal economist directs every engagement; custom Excel cost models and Power BI / Tableau dashboards are delivered for the client to own. ADA / Section 508-compliant formats, fixed fees quoted in writing.
